

MICROWAVE LAMPBASE E27

ECOSAVERS

EcoSavers® Microwave Lampbase E27

This product will help you to save energy.

It will automatically switch out the light when no movement is detected and therefor nobody is in the room anymore. The switch off duration is adjustable from 15 seconds to 5 minutes.

This product adopts the latest microwave technology sensor with high-frequency electro-magnetic wave. This acts as a kind of radar and can detect movements in a detection range of 360 degree around the unit. When human motion is detected, the light switches on automatically.

Advantage of this system against similar systems working on infrared (PIR) is that the microwave sensor also can detect through lampshades, doors, glass and even thin walls.

Technical parameters:

Power:	AC 220-240V~/50Hz
Max load:	60W traditional bulb 20W CFL or LED bulb
Standby power:	0.6W
Detection range:	360 degrees
Detection distance:	3 - 7 metres
Adjustable duration:	min. 15 seconds max. 5 minutes
Installing height:	2 - 3.5 metres
HF-system:	2.8HGz
Product size:	68 x 68 x 108mm
