

Using Instructions

LED Solar Spotlight RGB color

These instructions relate **ONLY** to this product and contain important information for using the product for the first time. Please keep these instructions for later reference and should always accompany the product in the event of transference to a new user.

1. Introduction

Dear Customer,

Thank you for purchasing the solar light. With this solar light you purchased a product manufactured according to the current state of technology.

This product fulfils all requirements of the valid European and national regulations. The conformity was proved. The relevant declarations and documentation are deposited with the manufacturer.

To maintain this state and guarantee a safe operation, you as the user will have to follow this operating manual!

2. Safety Instructions

- In case of damages caused by not following this operating manual, the warranty rights will expire! We exclude liability for any consequential damages!
- We exclude liability for property or personal damages caused by inappropriate handling or not following the safety instructions.

- In these cases any guarantee rights will expire.

Due to safety and admission reasons (CE) it is not allowed to arbitrarily reconstruct and/or change the solar light.

Therefore, please keep to the operating manual.

The accident prevention rules of the association of the industrial trade cooperative association for electric plants and working material are to be considered in industrial environments.

3. Usage in Accordance with Requirements

The solar spotlight is automatically switched on at darkness and switched out in the morning light. The maximum illumination duration with a full accumulator and without recharging is approximately 8 hours. The solar module installed in the upper part of the housing charges the integrated accumulator. The illumination may be switched on and off via a switch. With the "Mode" button you can press once to fix the currently selected color. Pressing the Mode button again to activate the change mode. Each color will light for about 1 minute. The solar spotlight is suitable for outdoor usage. Never sunk the spotlight into water. With the earth pole, it is possible to insert the spotlight into the ground or, by means of a mounting bracket, screw it to a wall. The product is designed for the application in a private environment.

Note: Please make sure that the solar module is preferably directed to the Southside and that shadows are avoided. When directing the module to the Northside it is not possible to use the product. The solar module shall always be free of snow in the winter.

4. Initiation

1. Please carefully take all parts out of the package and unwrap the accessories.
2. Via an earth pole, it is possible to insert the spotlight into the ground or, by means of an assembly plate, screwed to a wall or floor. The inclination of the spotlight and the solar module may be adjusted by means of a screw.
3. Now set the switch on the bottom side of the solar module to the position "ON".
4. With the "Mode" button, the lighting color can be select in the color changing color or continuous color.
5. Now wait at least one minute in order to determine in which mode the radiator is.
6. Now Changes the color of light, then he is in change mode. It will change all 6 light colors sequentially every minute.
7. Would now fix a color, then press the Mode button.
8. Press it again to go back to the change mode.

The solar spotlights is now activated!

pole mounting

screw mounting

Note: During the winter months the duration of illumination will generally be shorter. If the lamp should not shine on the first evening, please wait for a sunny day.

5. Exchange of Accumulators

After one to two years, the capacity of the accumulator pack will decrease. It is then required to exchange the accumulators. The accumulators are available in the shops or from the manufacturer.

1. Unscrew the 3 screws on the back side of the solar module and take off the cover.
2. Take the accumulator from the mounting bracket
3. Insert the new accumulator with correct polarity and close the housing in reverse order.

Note: Use batteries or accumulators must be disposed of in a non-polluting way and do not belong into the domestic waste. Your dealer is legally obliged to take back the old accumulators.

6. Malfunctions

- **Lamp is not automatically switched on at darkness**

- An outside light source (e.g. streetlight) simulates daylight and prevents the lamp from switching on. Place the lamp at a darker location.

- **Lamp is not switched on at darkness or only for a short period of time.**

- Is the lamp connected?

- Accumulator weak or defective. Exchange of the accumulators.

7. Specifications

Power Solarmodule:	0,4 Wp
Protection type:	IP 44
Protection class:	III
Battery:	1 pcs. Li-Ion 3,2 V/ 600 mAh AA-size
Illuminating units:	1 RGB- Chip
Illumination time:	max. 8 h with a full battery
Light color:	7 different colors

Battery take-back

- Batteries must not be discarded into domestic waste.
- The consumer is legally required to return batteries after use, e.g. to public collecting centers or to battery distributors.
- Contaminant-containing batteries are labeled with the sign "crossed-out trashcan" and one of the chemical symbols. Used batteries should be disposed environmentally friendly and should not be discarded into domestic waste. Your dealer is legally required to take back old batteries.

LI - ion

Rechargeable battery notes

- Rechargeable batteries should not be played with by children. Never leave rechargeable batteries lying around; they could be swallowed by children or pets.
- Rechargeable batteries must never be short-circuited, disassembled or thrown into fire. This leads to a danger of explosion!
- Leaking or damaged rechargeable batteries can cause chemical burns when they come into contact with skin. For this reason, please make use of suitable protective gloves.
- Rechargeable batteries should only be replaced by structurally identical rechargeable batteries from the same manufacturer. Normal batteries must not be used since these are not rechargeable.
- Make sure the rechargeable batteries are inserted with the correct polarity.
- For long periods of time of non-use (for example, storage), remove the inserted rechargeable batteries to avoid damages via the leaking rechargeable batteries.
